30 Nm/Hr	385000 EUR	LSFO

- Swiftly plan vessel deployment and itineraries
- Manage itineraries of a ship for an entire season from a single dashboard
- Make informed decisions well in advance based on a multitude of factors related to the ship, ports, sea-routes and fuel
- Compare individual & seasonal itinerary versions
- Select most appropriate sea-routes between ports
- Manipulate segments to decide on the most optimal itinerary
- Effectively manage port status and agent collaboration:
 - ▶ Raise & track berth reservation requests with port agencies
 - ▶ Raise & track port cost-info requests with port agencies
- Digitalize tour planning process and effectively connect cruise lines and shore excursions providers on one platform
- Benefit from structured workflows for Tour/Shorex design, purchase, sale, production, reporting and accounting
